

Filteroo® Joey 12L Gravity Ceramic Water Filter

Discover the ultimate in craftsmanship and peace of mind with our hand-crafted stoneware water filters. Created with love by world-class potters and using the finest quality stoneware clay and glazes, each gravity filter is a testament to exceptional artistry and durability.

Rigorously tested and certified for lead and cadmium safety, you can confidently enjoy pure, clean water. Choose from our premium world-class cartridge filtration options, including fluoride removal, to perfectly match your water needs. Each filter comes complete with an elevated base and a fast-flowing stainless steel tap for easy, efficient use. Cherish the blend of safety, quality, and convenience—your perfect water solution awaits.

The Most Complete Stoneware Gravity Water Filter In The World

Base

The base is a moulded elevated ceramic stand the gravity water filter sits onto, so you have enough room to place your glass under to fill.

Bottom Holding Tank

Fully glazed inside & out for an amazing smooth professional finish, very easy to wipe over clean, under the base is not glazed.

Stainless Steel Tap

Filteroo® always provides a free upgrade to a quality stainless steel tap with every Filteroo®. It is a much better quality tap with no plastic, easier to use and the flow rate is much better, so you can fill those larger kettles and containers faster.

Top Chamber

Glazed inside & out, so very easy to wipe over to clean when ever required. Underneath the top tank is not glazed. This tank has been increased in size so this water filter makes more water with less refills & effort.

Lid

The lid is another new design with a much bigger lid knob for a better grip. Fully glazed all over except the thin circular strip under the lid where it sits onto the bench top when hot kiln fired.

Filteroo® 5.5" Rain & City Water Carbon Block Gravity Water Filter Cartridge

It is the quality of the carbon used to create the carbon block cartridge and the professional manner in which they are manufactured which has passed all the tests at such high removal rates that makes this cartridge so unique. As the water passes through this cartridge slowly, the contact time with the cartridge allows for such a wide range of contaminant removal.

Manufactured for Filteroo® Australia who guarantee high-quality materials are always used. This single carbon block gravity cartridge is a highly efficient filter suitable to remove unwanted contaminants from any water supply. It is great for both rain water or chemically treated city water.

MAINTENANCE
Replace every 2200 Litres
or every 12 months when
water flow becomes to
slow, whichever comes
first.

Product Specifications

The carbon cartridge is 140mm (5.5") in height & 60mm in diameter.

Working ph range 5.5 - 9.5.

Hole diameter 12.5mm minimum to 20mm maximum

The cartridge threaded stem that holds the cartridge into place is 12.5mm in diameter and 34mm in length.

The cartridge threaded stem length with the washer on is 30mm.

Weight is approximately 300 grams.

Life Span: 2200 litres or 12 months whichever comes first.

TEST RESULTS

CHLORINE

99% when new, >90%
for the life of the
cartridge.

Capacity in Litres:
1400L

CHLORAMINES

99% when new, >90%
for the life of the
cartridge.

Capacity in Litres:
